Dear Bill:

In spite of your note telling me not to thank you for the mound of foreign coins I must express my enthusiasm for the box of this material. Our museum can well add some of the pieces to its collection. As an incentive for young people's groups I am able to let schools give some away or use them for a quiz. These and other efforts are made to encourage further interest in coin collecting. We give some away to young visitors who ask questions and show unusual interest in the exhibits.

So if you have more for us we would welcome them. Do you want a tax deduction as we are a 501(c)(3) organization?

Thanks again.

Sincerely,

Eric P. Newman

Dear Bill:

Thank you for the mounted foreign coins. They will fit into my plans perfectly. I really appreciate your cooperation.

I will have to rely on you for the "Coffey" quality. I need world wide as you say. I have piles of English, French Mexican and German junk and would appreciate it if those could be avoided and other countries substituted in the total. If that is what he will send then fine. The fact that they are mounted is very helpful. Check enclosed. I am glad they are in nice shape.

Glad you and Mike enjoyed your visit here. You are welcome to return, but let us not be under such time pressure.

Happy clicking.

Sincerely,

Dear Bill:

The heavy metal boxes arrived and my house now has a tilt. I appreciate your cooperation in helping us acquire these mounted foreign coins for give aways. The bank likes the idea of us giving away money.

You indicated you will send other issues as you get to them and that is very nice of you.

I tried to avoid receiving so much English, German and French junk but they were in the heap.

My best to you and your fine work.

Sincerely,

Eric P. Newman

Dear Bill:

Thank you so much for telling Kleeberg to send me your superb pictures of the Church penny and the PB cut piece. If they had used your pictures the items would have brought much more.

I got the impression from John that someone thought the Church penny die was used on a brockage. From what I see the description in the catalog is more correct. Can you imagine ruining a rare Church penny by pressing a later coin into it. There is no half cent reverse showing as it would in a normal brockage.

Thanks again. See you in Denver or sooner.

Sincerely,
